Sixty Word Description of Services:

Avalon Document Services is the perfect extension to your litigation support team! We have worked with law firms and corporate legal departments since 2000 on a variety of copying, scanning and processing electronic discovery. We use a consultative approach toward each client to find the best solution to your needs. We do not sell any "one size fits all" solutions at Avalon. Although we are technology based, our copy centers are able to work on any sized project with extremely tight deadlines. Being available 24/7 makes Avalon the perfect solution for your next copy, scan or electronic discovery project.
